Kidvive Fun & Learn Activity School is an online learning platform designed for children aged 2 to 6 years. Our school offers a carefully structured curriculum across four levels: ECD (2-3 years), Play (3-4 years), Nursery (4-5 years), and KG (5-6 years), focusing on the developmental needs of young learners. Each level is designed to provide children with a strong foundation in key academic areas while making learning engaging and enjoyable. In the ECD level, we emphasize parental involvement, guiding parents on how to teach their children essential skills in motor development, communication, and early cognitive abilities. The goal is to create a strong foundation at home that supports children's early learning.

At the Play level, children begin learning alphabets, words, tracing, and rhymes while also exploring basic math and science concepts. The curriculum is designed to keep children engaged and curious, offering subjects like Bangla, English, Math, Storybooks, and Coloring, all taught in a fun and interactive way.

The Nursery level builds on these skills by introducing sentence formation, expanding vocabulary, and diving deeper into intermediate science concepts. Children are also encouraged to develop their critical thinking and problem-solving abilities through subjects like Bangla, English, Math, and Storybooks.

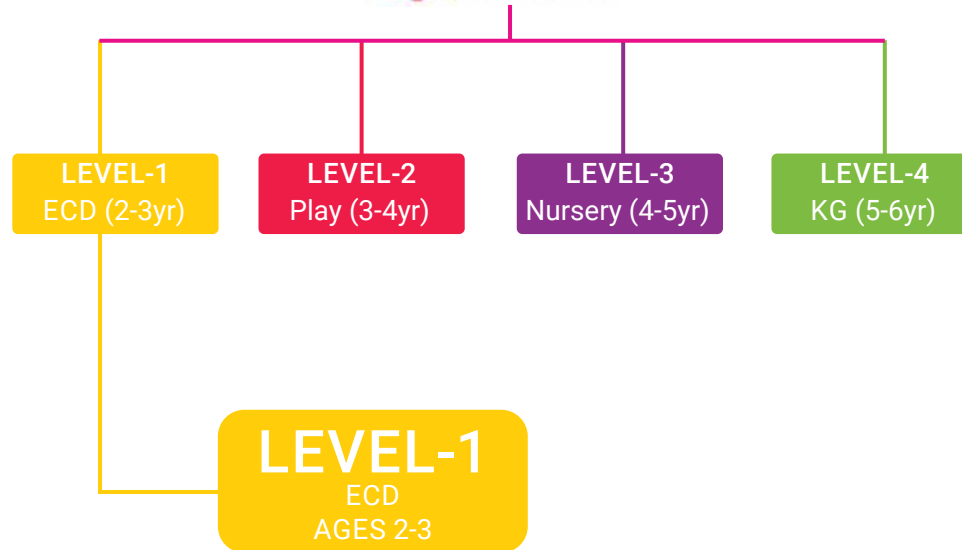

In the KG level, children refine their sentence-making, continue learning math and science, and work on writing skills with fill-in-the-blank rhymes. This level focuses on preparing children for formal schooling, giving them the necessary tools to succeed in a school environment.

At Kidvive Fun & Learn Activity School, we combine interactive learning and engaging activities with a focus on parental involvement, ensuring that children receive a well-rounded education. Our goal is to make learning enjoyable while providing children with the skills they need for future academic success.

Fun, Learn & Grow

Our ECD program is designed to foster cognitive, social, emotional, and physical growth in children aged 0-3 years through discovery, exploration, and skill-building. The package includes 10 engaging activity books (coloring, rhymes, stories, flashcards, and more) and 19 interactive study tools (art supplies, building blocks, magnetic letters, math tools, and more) to nurture creativity, language skills, and a scientific mindset. The ECD level is designed to teach young children while primarily focusing on guiding parents. Parents receive step-by-step instructions on how to effectively educate their 2-3-year-old children at home.

About Our Program

ECD (Early Childhood Development) Ages 2-3

The ECD level is designed to introduce early learning while primarily focusing on guiding parents on how to teach their children effectively. At this stage, children are in their formative years, absorbing information from their surroundings. However, they learn best when parents are actively involved. In this program, parents receive structured guidance on how to engage their 2-3-year-old children in meaningful learning activities. Through simple exercises, interactive play, and daily routines, parents help children develop early cognitive, motor, and communication skills. The teaching process is structured for parents with clear step-by-step instructions on how to start and complete each activity. Children at this level begin learning through sensory experiences, basic vocabulary, colors, and shapes. The goal is to ensure a smooth transition into the next stage of structured learning while helping parents build an effective learning environment at home.

Fun, Learn & Grow

How To Use This Book

As beginner artists, we need to make it simple, so all we can start with is a piece of paper, a pencil, and an eraser but feel free to use any tool you like, be creative, and have fun. The drawings are organized from easy to advanced, you can follow the respective order or make your own one. The important thing is to enjoy the process.

Let's Draw

- ➡ Draw the shadow lines from the first drawing.
- ➡ Add the shadow lines from each additional step.
- ➡ If you get stuck, practice by tracing the final image. Then, try drawing it yourself from the start.
